Installation Instructions For Brushed Aluminum Signs

Step 1. For ADA compliance, the **center** of the sign needs to be 60" up from the floor, on the doorknob side of the door.

Step 2. Remove the liner from the tape and press sign against the wall.

Notes: If your wall is textured, has wall paper, or you just want to make sure this sign never comes down, we recommend using dabs of RTV silicone adhesive behind the sign. The tape will hold the sign until the silicone sets up.

Cleaning:
If the signs become soiled, use a mild soap and water. Do NOT use rubbing alcohol or isopropyl alcohol or a fast evaporating solvent. It will crack the Braille.
